Co-ordinate your information systems to achieve optimum efficiency in managing compliance operations and data

Environmental Data Management, LLC (EDM) is in the business of helping companies manage their environmental, health and safety (EH&S) compliance and operational commitments.

EDM provides companies with the tools to create, maintain, and improve their Environmental Management System (EMS) programs, including the software to back it up! We specialize in establishing enterprise wide systems that incorporate the elements necessary to keep an operation in compliance. We focus on the "nuts and bolts" associated with compliance at the front line with a keen eye on management's goals for an EMS.

EDM is a company comprised of experienced environmental managers who understand the rigors and dynamics associated with day-to-day operations and have designed our products and services to provide valuable practical solutions.

We accomplish this primarily through three service offerings:

ems consulting services

Development of enterprise-wide Environmental Management Systems

eh&s e-business solutions

Helping Manage existing data to improve existing systems

comm-trac™

A software tool designed to manage all tasks associated with an enterprise-wide EMS

E-Business Solutions

The complexity of the EH&S function has caused increasing dependence on electronic business (E-Business) solutions. EDM specializes in helping our clients to optimize the processes, software and hardware systems that support effective planning, communication, decision making, reporting, record keeping, and assessment within an effective management structure. Our EH&S e-Business services include:

▼ Needs Assessment & Gap Analysis

▼ System Design, Development, Implementation, and Training

▼ Tracking, Communicating, and Managing new and emerging Legislative and Regulatory Changes

▼ Preparing Existing Business Systems for EH&S Electronic Integration

▼ Electronic Preparation And Submittal Of Regulatory Reports

▼ Use Of Internet/Intranet Resources to maximize EH&S Management Efficiencies

▼ Tracking, Communicating, and Managing EH&S and Business Metrics
